# Indirect Tax Services

# ACCOUNTANCY

## **General Accounting Support**

Providing assistance in various accounting tasks, such as bookkeeping, financial statement preparation, account reconciliations, and data entry.

## **Accounting System Reviews**

This includes analyzing the design and operation of the system, identifying any weaknesses or areas for improvement, and providing recommendations for enhancing the system's performance.

## **Budgeting & Cash flow Planning**

Budgeting and cash flow planning provide a framework for organizations to manage their finances effectively, make informed decisions, and ensure that they have the resources necessary to achieve their goals.

## **Annual Financial Report Preparation**

Annual financial report preparation involves gathering and analyzing financial data, creating financial statements such as balance sheets, income statements, and cash flow statements, and presenting the information to stakeholders.

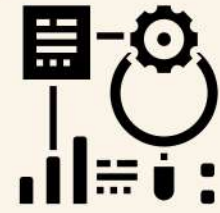

## **Payroll & Cash Management Reporting**

Payroll reporting involves documenting and communicating employee compensation, while cash management reporting entails monitoring and analyzing cash inflows and outflows within an organization to manage liquidity and financial risk.

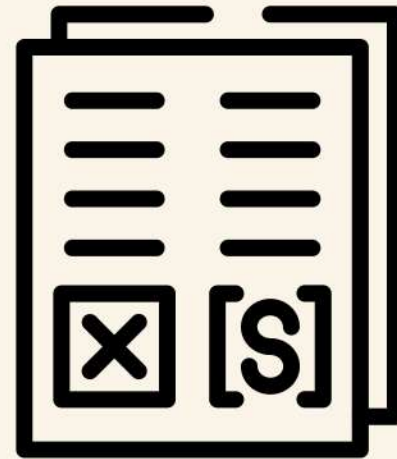

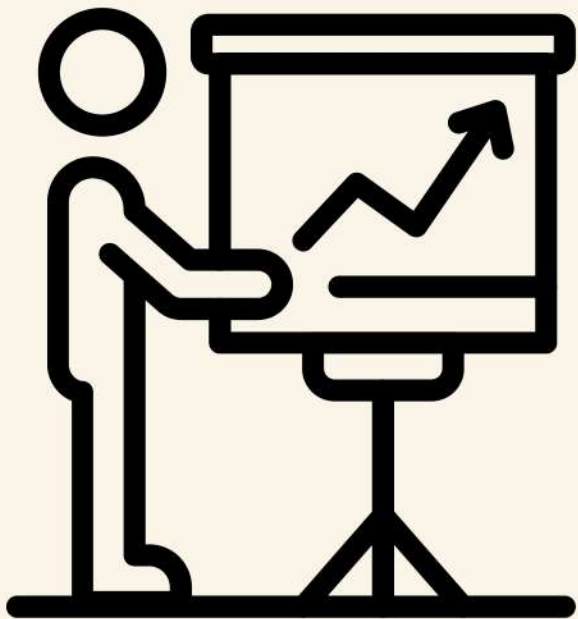

## **Support throughout Audit Process**

Support throughout the audit process involves providing relevant documentation, responding to auditor inquiries, and facilitating access to necessary personnel. This helps ensure a smooth and efficient audit process and can help mitigate potential compliance issues or financial reporting errors.
